Flight Search

What Is the Flight Search Page?

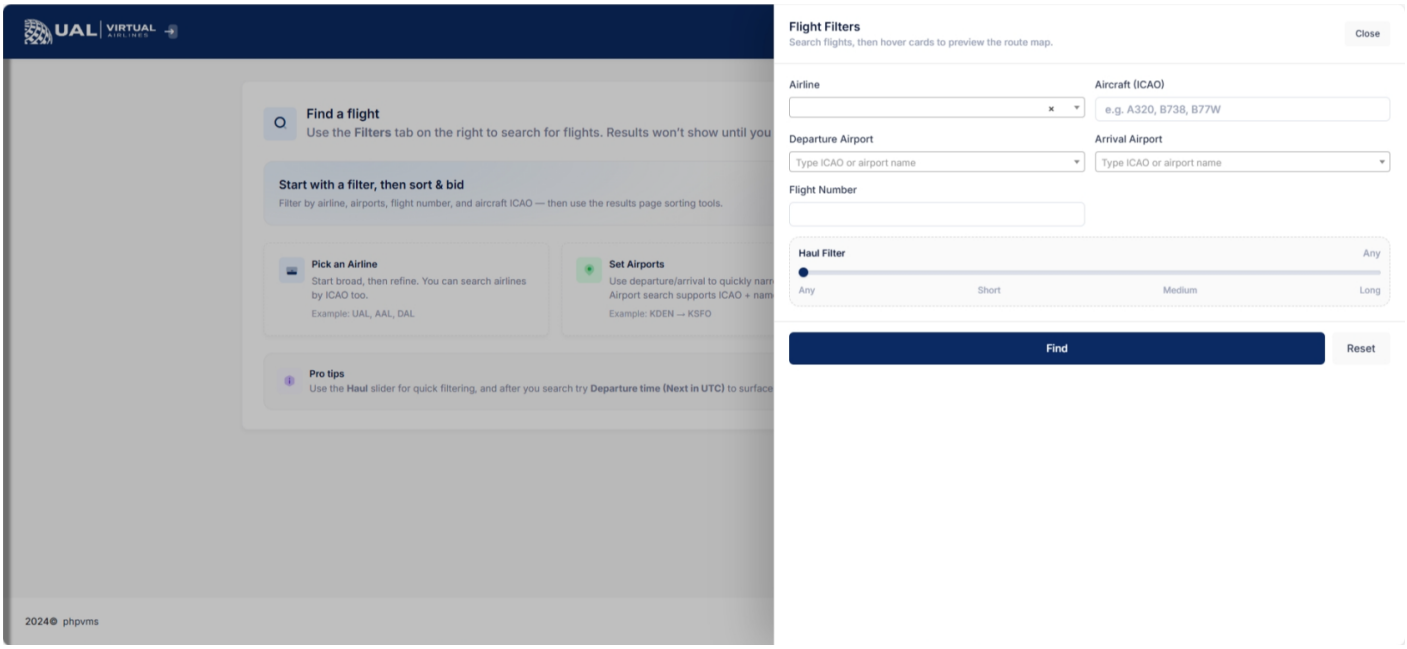

The Flight Search page allows you to browse and filter UVA's published schedules.

This is where you select your next operational flight.

All scheduled flights listed here are part of the official UVA route structure.

Using the Search Filters

At the top of the page, you can narrow down results using search filters such as:

- Airline
- Aircraft / Subfleet
- Departure Airport
- Arrival Airport
- Flight Number
- Additional operational filters (if applicable)

Filters allow you to quickly locate routes that match your aircraft, hub, or preference.

You may use one or multiple filters at the same time.

Understanding the Results Table

How this page works

Search routes first — then use **More Details** to view the route map and bid the flight.

Search & Filters
Use the filter drawer to narrow results by airline, departure/arrival, route code, flight number, and haul length.

About Subfleets
Subfleets are grouped by **airline + aircraft type** (example: **AAL 738** = American Airlines 737-800). Flights/schedules aren't locked to one aircraft — you choose what you want to fly on that route.

More Details & Bidding
Click **More Details** on a flight card to view the route map. When you click **Add to Bids**, the aircraft picker will narrow to aircraft for that **airline**.

2026© Fly UVA, Inc. Powered by phpvms

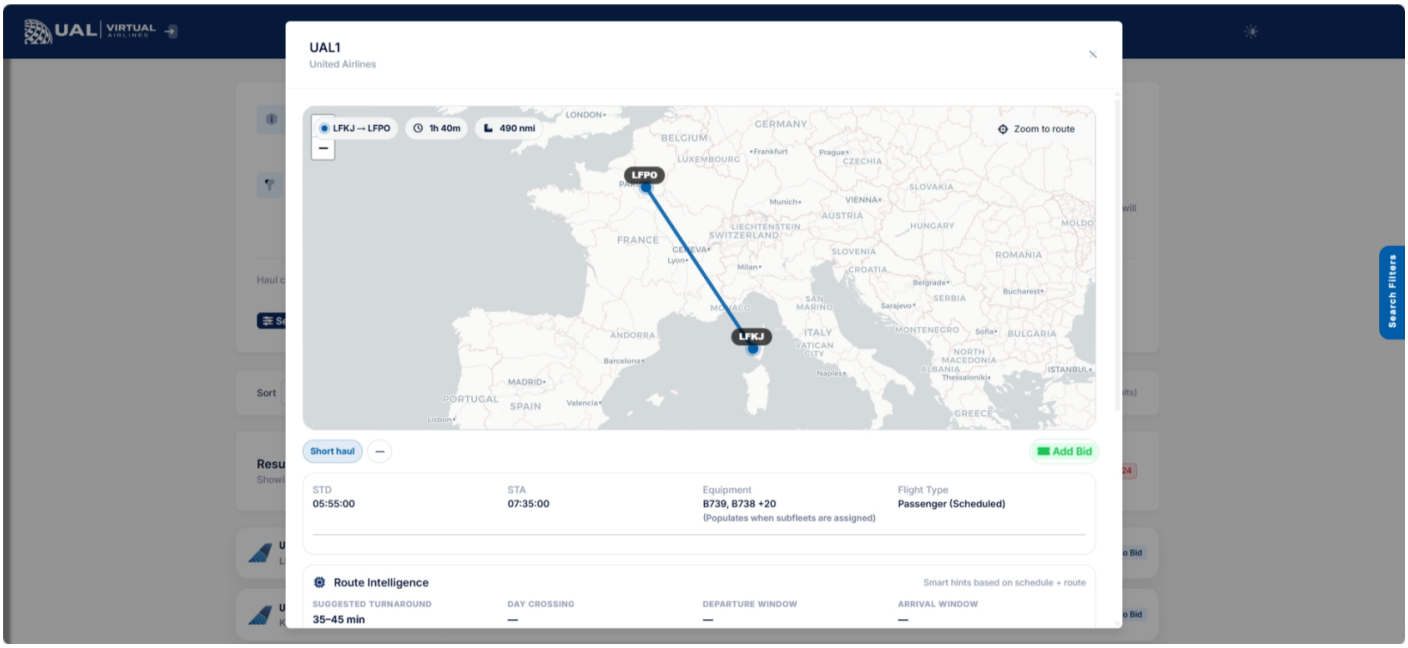

Search results display scheduled flights in a structured table.

Each row typically includes:

- Airline
- Flight Number
- Departure Airport
- Arrival Airport
- Scheduled Departure / Arrival Time
- Aircraft Type
- Flight Time / Block Time
- Additional operational details

These are real UVA schedule entries — not dynamically generated routes.

Viewing Flight Details

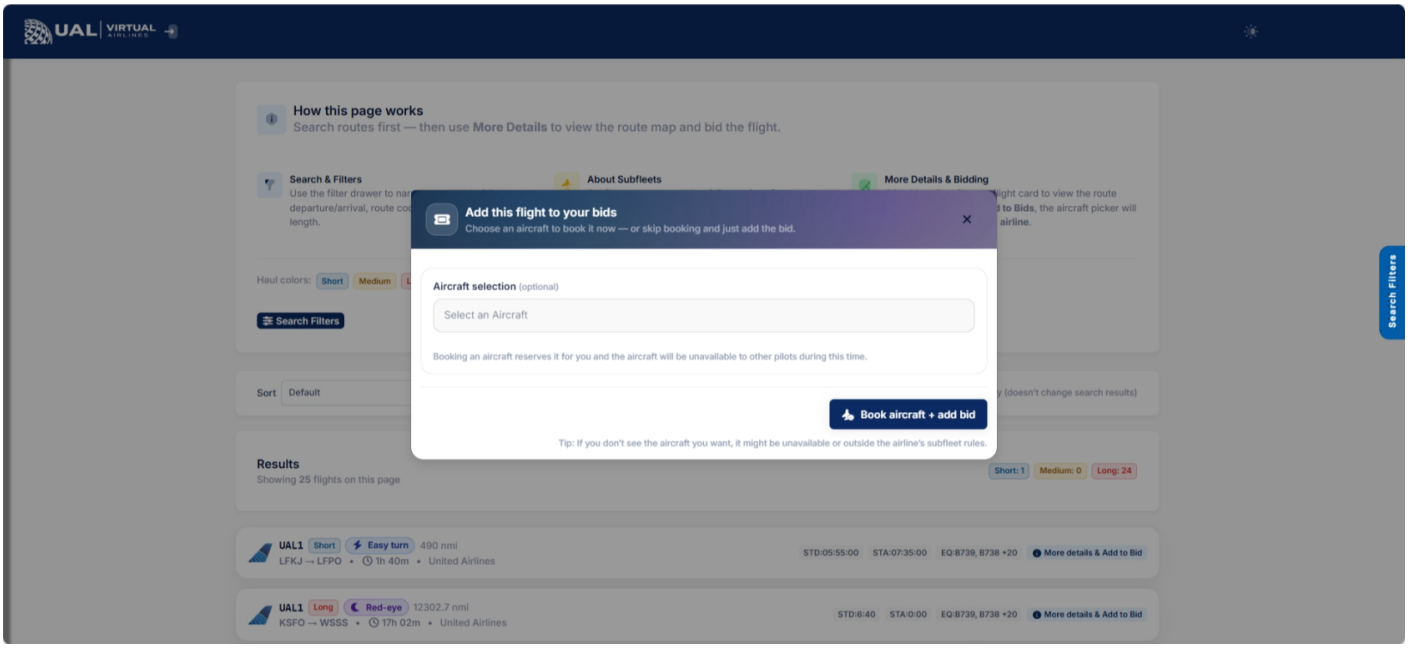

Selecting a flight opens the detailed Flight page.

On the Flight Details page, you will see:

- Full route information
- Aircraft assignment
- Departure and arrival airports
- Operational notes (if applicable)
- Route map visualization
- Dispatch options

This page confirms exactly what you are bidding.

Bidding a Flight

When you select a flight:

- You may add it to your bids.
- It becomes your active flight.
- You cannot add another bid until the current one is completed or removed.

UVA enforces a one-active-bid policy.

If you already have a bid, you must remove it before selecting a new flight.

Route Map

The schedule system includes route mapping.

Maps display:

- Departure airport
- Arrival airport
- Route visualization

This provides a visual overview of the flight before dispatch.

Operational Expectations

When selecting a scheduled flight:

- Ensure you are flying the correct aircraft/subfleet.
- Follow realistic routing procedures.
- Comply with all AutoPIREP standards.

Scheduled flights are structured to reflect realistic airline operations.

After You Bid

Once a flight is added:

1. It appears on your My Bids page.
2. You may dispatch and fly it.
3. Submit your PIREP through smartCARS.
4. AutoPIREP will evaluate your flight.

Upon acceptance, your bid clears automatically.

Scheduled Flights vs Free Flights

Scheduled Flights:

- Part of UVA’s official network.
- Structured, realistic routes.
- Often tied to Tours, Events, and Career Mode.

Free Flights:

- Custom-created routes.
- Designed for flexibility.
- Not part of the published schedule network.
